Build Your Own Interactive Courses With The Generator

Easy as 1-2-3 – Develop, Publish, Deliver

The Generator is an extraordinarily simple and exceptionally effective interactive course building tool. It puts our proven learning templates in the direct reach of subject-matter experts through intuitive drag and drop functionality to create custom courses. The first of its kind, the patented and award-winning cloud based software connects multiple contributors into a collaborative knowledge capture process. Generate video, audio, text, images, interactivity, practical exercises and quizzes for engagement of all learning styles. Create, deploy and up-date your courses with a click of a button. And now, leverage the added features and functionality of The Generator 2.0, AutoTranslate and The Workflow Workbook.

Ask about our enterprise, education and channel partner programs.
GeT the Difference? The largest industry library on the most advanced learning platform.
